

Professional Tyre Solutions

# Terminal Tyre

SPECIFICATION SHEET

## HIGH QUALITY RETRADING OFFERS THREE ADVANTAGES

The world's retreaded tyre market is constantly growing, and in the industrialized nations it has even reached and surpassed the volume of the new tyres sold into the truck sector.

Reliability of the product, economic savings, and respect for the environment are the leading reasons for the international success of these products and the companies that produce them.

## COMPLETE RELIABILITY

The high quality of the raw materials available, the sophisticated production processes based on the use of state of the art technologies, the strict controls for the verification of casing suitability, and the quality of the finished product all permit retreaded tyres to achieve levels of reliability comparable to those of new tyres.

## BIG SAVINGS

When tyres are used correctly, they can be retreaded using the same casing while maintaining performance and life span virtually intact.

Retreading costs around half the price of a new tyre. The same life-span and performance at half the cost are therefore the most tangible advantages offered by retreaded tyres.

## RESPECT FOR THE ENVIRONMENT

Today retreading processes ensure the recovery of 75% of the raw materials which make up the new tyre. Natural resources like rubber, petroleum, steel, and fibres are recovered and recycled in the production process.

Precious materials such as these are no longer wasted, and the delicate balance between respect for the environment and the demands of industry is thus optimized.

Peace Of Mind

# Terminal Tyre

## SPECIFICATION SHEET

### *Alterever Terminal Range*

Sizes available	320.70.22.5 & 315.60.22.5
Tread	26mm
Load index	164b ECE Reg 109 approved
Maximum speed	40kph
Section width	280mm
Rolling circumference	3000mm
Load Index & speed	164B ECE Reg 109 approved

### *The Terminal Tyre features*

- The very latest compound technology
- Better fuel economy

### *The Terminal Tyre applications*

- Terminal tractors

### *The Alterever benefits*

- Excellent reliability
- Even wear profile
- Curbing band
- High resistance to accidental damage
- Less machine downtime
